Bentley Infrastructure Cloud Entitlements

Capability	Bentley Infrastructure Cloud Connect	Bentley Infrastructure Cloud ProjectWise	Notes
Manage project and asset data	✓	✓	Manage all project and asset information in one controlled environment.
View, create, and synchronize models	✓	✓	Create, review, and keep 2D/3D/4D models synchronized across the team.
Manage teams (internal and external)	✓	✓	Invite companies and users, control permissions, and manage project roles.
Manage documents and deliverables	✓	✓	Store, version, and share project documents with reliable access control.
Mobile access	✓	✓	Work from browser or mobile apps, including selected offline workflows.
Reporting dashboard	✓	✓	Use dashboards to monitor KPIs, risks, and project health at a glance.
Maps and GIS	✓	✓	View portfolio and project locations on an interactive GIS map.
View reality data	✓	✓	Overlay meshes, point clouds, and 360° imagery with design models.
Model federation with Open applications	✓	✓	Combine models from Bentley Open apps into a single coordinated view.
Model federation with third-party apps	✓	✓	Bring in third-party and IFC models into federated iModels.
Carbon calculation	✓	✓	Estimate carbon and sustainability metrics based on model quantities.
Issues management	✓	✓	Capture, assign, and track issues, RFIs, and comments through to close.
PDF markup	✓	✓	Review, redline, and comment directly on project PDFs.
Manage PDF renditions	✓	✓	Generate and manage PDF outputs created from source design data.
Deliverables management	✓	✓	Plan, track, and approve contractual deliverables and handover packages.
View clash results and clash visualization	✓	✓	Inspect model clash results visually without rerunning detection.
AI-powered media indexing	✓	✓	Automatically recognize and tag photos and videos for fast searching.
SYNCHRO Field (legacy capabilities)	✓	✓	Represents field-oriented data capture features from the former SYNCHRO Field product.
SYNCHRO Control (legacy capabilities)		✓	Represents control-room planning and oversight features from SYNCHRO Control.
Manage forms		✓	Design, publish, and administer standard forms for project workflows.
Model conditioning		✓	Clean and prepare design models for coordination, review, and analysis.
Create and manage enterprise connections		✓	Connect projects to enterprise systems and configure data exchanges.
Create, edit, and run clash detection		✓	Define rules, run clash checks, and refine detection configurations.
Advanced civil tools		✓	Run advanced civil design checks like profiles, clearances, and drive-throughs.
Engineering document collaboration		✓	Use the desktop client with managed workspaces for integrated design and reference management.
Construction tracking and management		✓	Track construction status over time using 4D, tasks, and progress data.
Component center		✓	Share standard components and content libraries across multiple projects.
Add a Power BI dashboard		✓	Embed tailored Power BI reports as part of the project dashboard.
